Harmeet Singh

Software Engineer | Java | Full Stack | Cloud & AI Integration

hs978698@gmail.com | +91-8084711625 | linkedin.com/in/harmeetajimaljsr | github.com/harmeetsinghjsr | Jamshedpur, Jharkhand

Summary

Computer Science graduate (B.Tech, July 2026) with a strong foundation in Core Java, Object-Oriented Programming, Data Structures & Algorithms, and SQL. Completed a Quality Engineering & Assurance internship at Cognizant, building Java-based Selenium automation against a live web application. Hands-on across the stack through independently shipped projects spanning serverless AWS applications, React front-ends, REST API integration, ML classifiers, and Ethereum smart contracts.

Technical Skills

Languages: Java, Python, JavaScript, SQL, C/C++, Solidity, Kotlin, R, HTML/CSS
Core CS: Object-Oriented Programming, Data Structures & Algorithms, Collections, Exception Handling, Software Design
Backend, APIs & Frontend: RESTful APIs, API design & integration, JSON, Node.js, OpenAI API, ethers.js, React.js, Vite
Cloud (AWS): Lambda, API Gateway, S3, CloudWatch, IAM (least-privilege)
Databases & Testing: MySQL, SQL query writing; Selenium WebDriver, TestNG, Page Object Model, debugging, SDLC
Tools: Git, GitHub, Maven, Linux, IntelliJ IDEA, VS Code
Also: scikit-learn, Power BI (DAX), Tableau, R Shiny, Hadoop, Arduino/Embedded C

Experience

FixGenie Consulting Inc — Software Developer Intern Sept 2026 – Present

Remote (Ontario, Canada)

- Build and run FixGenie's Python lead-generation and cold-email system: it sources and validates B2B leads (OpenStreetMap Overpass), de-duplicates them into a Google Sheets CRM with fuzzy matching, and sends a personalized multi-step sequence with LLM-drafted openers that follows up automatically and stops on reply, unsubscribe, or bounce; backed by Resend + Nodemailer, Redis/BullMQ queues, and n8n + GitHub Actions scheduling, kept CAN-SPAM/CASL-compliant with an unsubscribe footer and suppression list.
- Build and operate fixgenie.co, the company's marketing site: a Next.js 16 (App Router) + React 19 + TypeScript app styled with Tailwind CSS v4 and shadcn/ui (Radix), animated with Framer Motion / GSAP / Lenis and enhanced with Three.js 3D visuals; deploys to a VPS via GitHub Actions → Coolify.

Cognizant Technology Solutions — Intern, Quality Engineering & Assurance (QEA) Jan 2026 – May 2026

Chennai, Tamil Nadu

- Built a Selenium + Java + TestNG automation suite on the Page Object Model covering three flows of a live travel-booking application: cab booking with dynamic future-date generation, form-validation error capture, and dropdown value extraction.
- Applied Java collections, loops, and structured programming patterns to debugging and problem-solving tasks.

Cipher Schools — Summer Training Intern (Remote) Jun 2024 – Jul 2024

- Built Core Java and OOP proficiency; implemented and analyzed data structures and algorithms (sorting, searching, and complexity analysis).

Projects

Resonance — AI Text-to-Speech & Voice Platform

Next.js, TypeScript, tRPC, Prisma, PostgreSQL, Clerk, Chatterbox TTS, Modal, FastAPI, Cloudflare R2

- Shipped a full-stack, multi-tenant AI voice platform (live on Vercel): text-to-speech in 20 voices with tunable controls, live waveform playback, and downloadable audio.
- Wired the whole stack together: a Next.js 16 and React 19 front end, a tRPC API over Prisma and PostgreSQL, Clerk for multi-tenant auth, Chatterbox TTS self-hosted on Modal serverless GPUs behind FastAPI, and generated audio served from Cloudflare R2 through presigned URLs.

Cloud Browser — Serverless Web Fetcher AWS Lambda, API Gateway, S3, CloudWatch, React.js

- Built a serverless tool that fetches and renders the HTML of any public URL: a React.js + Vite front-end on Amazon S3 static hosting, a REST API on API Gateway invoking a Node.js Lambda under least-privilege IAM, and CloudWatch alarms on success rate, latency, and errors.

Harmflix — Movie Discovery App — a React + Vite SPA (deployed on Netlify) with debounced TMDB search and an Appwrite backend that aggregates search counts into a live trending-movies list.
Also built — a *MetaMask* interface answering natural-language wallet queries via the OpenAI API (React, ethers.js); a Python spam classifier at about 96% accuracy (SVM/Logistic Regression, TF-IDF); *HarCoin*, an ERC-20 token DApp on Sepolia (Solidity); health-analytics dashboards over 28+ Indian states (R, Shiny).

Achievements & Certifications

- **1st Rank** — Leading Management Idea Hackathon, 2025 (200+ participants). **7th Rank** — Binary Blitz Hackathon, 2024 (200+ teams, 5,000+ participants). **1st Prize** — National Science Exhibition, 2022.
- Certifications: Divide & Conquer, Sorting and Randomized Algorithms (Coursera); Predicting Stars, Galaxies & Quasars with ML; Web3 Fundamentals & Blockchain; CLI with Golang (Infosys).

Education

Lovely Professional University — B.Tech, Computer Science & Engineering Aug 2022 – Jul 2026

Phagwara, Punjab | CGPA: 7.66 / 10

Sri Krishna Public School, Jamshedpur — Class XII & Class X 78% | 92%
